GRADUATE RESEARCHER

Feb 2015 – Current

- Advisor: Gunhee Kim
- **Multimodal info Retrieval.** Developed methods for retrieving a corresponding movie-review blog(text and image,video contents) and aligning on movie using CRF (Conditional Random Field) algorithm. Also developed video retrieval from language query. *Won LSMDC 2016 challenge*
- **Visual Summarization.** Implemented Multi-channel ego-centric video summarization for industrial project. I also leading project for deep ranking model for video summarization (Under review in ACM MM).
- **Vision & Language, Visual QA.** Won three competition in LSMDC 2016 challenge (Multichoice QA, Movie Retrieval and Fill in the Blank). For video QA, I have the experience of leading the industry project on movieQA. Additionally, our team collected TGIF-QA dataset and develop state of the art method, which will be presented in CVPR 2017 (spotlight). I actively try to use NLP to enhance machine intelligence of Vision.
- **Video saliency prediction** Developed recurrent saliency/human gaze prediction for video. Our work will be presented in CVPR 2017.

UNDERGRADUATE RESEARCHER

June 2014 – Dec 2014

- Advisor: Sun Kim
- Based on the opinion of the advisor, I developed the final term project in class as a research project. To classify RNA expression for drought resistance of rice from other, i tried unsupervised feature selection and clustering on water-stress controlled RNA expression data.
- The result of research project is presented in GIW 2016 and Bioinformatics journal.
